

**STERILE NYLON FLOCKED SWABS**

Bio-Acquire flocked swabs are creatively designed with perpendicularly coated nylon structures for optimal specimen collection and elution into transport media.

The soft brush like nylon fibre texture minimizes patient discomfort. Bio- Acquire flocked swabs also feature a molded breakpoint that allows clinically safe and convenient break off of the swab stick.

Bio-Acquire are used to collected specimens to diagnose bacterial and viral infections.

## Features

Perpendicularly coated facilitates rapid and efficient dislodging of specimen

Long shaft allows easier access to sites

Nylon flocks allow efficient elution

Convenient break point
